eCTD
Practical experiences of the eCTD pilot project and way forward

26 August 2016
SAPRAA

Estelle Taute
Overview

- Pilot Project
- Specifications & Guidelines
- Requirements vs Actual
  - Validation issues
  - Lifecycle management
  - Leaf titles
  - Evaluation phase
- Lessons learnt - conclusion
- eCTD roll out
Pilot project

Products

- 18 Applicants
- 18 molecules → 43 products because of different strengths
  - 9 NCEs of which 3 biologicals
  - 9 Generics (multisource) + 1 duplicate

Reviewers

- 9 Experienced external + 2 internal
  - 3 clinical, 4 quality, 1 biological, 1 scheduling
  - 1 Names & Scheduling, 1 Inspectorate
Pilot project - cont

Status

- 4 products registered
  - 2 NCEs
  - 2 Generics and a duplicate
- 1 product rejected by MCC
- 1 product withdrawn by applicant
- 12 products at various stages
- additional strength included for 1 product in the process
Guidelines & Specifications

Everything required for paper CTDs

PLUS eCTD specific documents

CTD e.g.:
- ZA CTD
- Module 1.2.1
- 2.01 General Information
- 2.05 Stability
- 2.06 Biostudies
- 2.07 Dissolution
- ..... 
- 2.24 Guidance General Module 1
- 2.25 P&A CTD
- 6.15 Screening template for new applications for registration
- SA Guide to GMP

Plus
- 6.16 Validation Template for Applications for Registration in eCTD Format
- 2.21 South African Specification for eCTD Regional & Module 1
- 2.22 South African eCTD Validation Criteria
- 2.23 Guidance for the Submission of Regulatory Information in eCTD format
- 2.27 eCTD Checksums
- 2.28 Q&A Implementation of eCTD in South Africa
- Electronic Common Technical Document Specification V3.2.2 (http://estri.ich.org/eCTD/)
eCTD ??
eCTD requirements

2.21 Specification and 2.23 Guidance
• Requirements for copying and pasting, viewing, searching and navigating
• File formats, PDF versions, requirement for OCR scanning
• Maximum individual file size
• Labelling of media
• Letter of application
• Lifecycle management, e.g. For the letter of application leaf elements provided with all eCTD-sequences, the operation attribute should always be “New.”
• 3.2R structure

2.22 South African eCTD Validation Criteria
• Pass, fail, and best practices
Requirement vs Actual
Administrative errors

- CDs not correctly labelled
- Validation template (in 1.8) – *hard copy not included*
- MD5 checksum not signed and dated
- Virus check statement in letter does not indicate virus-free
- Amendment schedule attached in hard copy – *not required*
Administrative errors cont.

VALIDATION TEMPLATE FOR APPLICATIONS FOR REGISTRATION IN eCTD format

The Validation Template is to be used on receipt of an application for registration of a medicinal product for human use submitted to the South African Regulatory Authority in eCTD format, as well as for follow-up sequences.

Sequence 0000 (new application for registration): Complete Sections A.1, A.3, B, C, and D.

Amendments / follow-up sequences: Complete and submit only Sections A.1, A.3.

0003: Blank Sections B, C and D need not have been included.
Validation template

<table>
<thead>
<tr>
<th>8a</th>
<th>Letter of Application (module 1.0)</th>
<th>C</th>
<th>Y</th>
<th>N</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Has the virus check statement been included?</td>
<td>C</td>
<td>Y</td>
<td>N</td>
</tr>
<tr>
<td></td>
<td>Does the virus check statement indicate that the submission is virus-free</td>
<td>C</td>
<td>Y</td>
<td>N</td>
</tr>
<tr>
<td></td>
<td>Does the letter of application clearly indicate different strengths?</td>
<td>C</td>
<td>Y</td>
<td>N</td>
</tr>
</tbody>
</table>
Administrative errors cont.

Element 1.8 - Validation Template

1. The date of receipt is for this office to complete.
2. The requirement for follow-up sequences was not adhered to. Only sections A.1 and A.3 need be submitted.
3. It should be confirmed in the letter of application that the submission is virus-free - A.1 8a.
Documents in paper format

2.23 Guidance
*Mandatory for all application types

<table>
<thead>
<tr>
<th>Module no.</th>
<th>Name of document</th>
</tr>
</thead>
<tbody>
<tr>
<td>*1.0</td>
<td>Letter of Application</td>
</tr>
<tr>
<td>*1.2.1</td>

</tbody>
</table>
Technical Validation failure *cont.*

- File or folder name contains invalid characters
- DTD checksums not valid
- PDF password protected
- Unreferenced files
- Files in Module 3 missing (export path too long)
  - *All showed own validation report as “valid” - but validation carried out on the submission e.g. on desktop and not on medium submitted*
To avoid creating thumbs.db files, the applicant is advised not to open files or folders *after publishing* and *before burning* the sequence on CD.

It is possible to disable thumbs.db files in Microsoft Windows.
Technical Validation Failure *cont.*

- **Unreferenced files**

<table>
<thead>
<tr>
<th>Status</th>
<th>Path/File</th>
</tr>
</thead>
<tbody>
<tr>
<td>(Submission)</td>
<td>Submission level tests</td>
</tr>
<tr>
<td></td>
<td>Unreferenced files found.</td>
</tr>
<tr>
<td>d:\10000\m3\32-body-data\32r-reg-info\32r1-availability\32r11-overview\thumbs.db</td>
<td></td>
</tr>
<tr>
<td>d:\10000\m3\32-body-data\32r-reg-info\32r1-availability\32r14-pharmaceuticalavailability\studies\32r142-other\thumbs.db</td>
<td></td>
</tr>
<tr>
<td>d:\10000\m3\32-body-data\32r-reg-info\32r6-animal-human-orig\thumbs.db</td>
<td></td>
</tr>
</tbody>
</table>

*Hint:* There are no unreferenced files in the root folder, M1, M2, M3, M4 & M5 folders (including subfolders but excluding ‘util’ subfolders, the index-md5.txt and index.xml).

<table>
<thead>
<tr>
<th>Rules</th>
<th>Severity</th>
</tr>
</thead>
<tbody>
<tr>
<td>No. 07</td>
<td>Error</td>
</tr>
</tbody>
</table>
Technical Validation failure cont.
Unable to make ISO copy – new and responses

- DVD-RW or CD-RW used
- Multisession DVD suggesting that it may not have been properly closed
- Zipped file submitted
Prevent Technical Validation Failure

- Carry out validation on medium submitted to prevent false valid result. Don’t open files or folders after publishing and before burning the sequence on CD.
- Check export path length – prevent files from not being exported and to be missing
- Checksum to be valid
- PDF not to be protected by security settings or a password (current rule no. 18)
- Ensure that file or folder name contains no invalid characters
Best Practice Warnings

File size exceeds 100 MB (rule no. 28) *being changed to 200 MB*

<table>
<thead>
<tr>
<th>File Path</th>
<th>Number</th>
<th>Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>/m3/32-body-data/32p-drug-prod/active-capsuleallstrengths/32p2-pharm-dev</td>

<td></td>
</tr>
</tbody>
</table>
Best Practice Warnings cont.

- Broken bookmarks
- Broken hyperlinks
- PDF does not open in “Most recent view”

```
/m1/za/10-application-letter
application-letter-0001.pdf

The PDF does not open in 'most recent view'.

0001 : Title: 1.0 Application Letter, Destination:
wrongzoomcount : 1

Hint: PDFs open in “most recent view” (i.e. 'inherit zoom' for bookmarks and links, and 'default' in open dialogue box. (ICH eCTD spec p7-4)).
```
Best Practice Warnings cont.

you are just that smart. any problems because if you can read this without like
Life cycle management

2.23 Submission in eCTD format

Operation attribute to be “new”

1.0 Letter of application
1.2.1 Application form
1.2.2.1 Proof of payment
1.2.2.4 Electronic copy declaration
1.5.2.1 Tabulated schedule of amendment

Validation template

6 For follow-up sequences, is the operation attribute of the following documents reflected as “new”
Business validation failure

- Incorrect operation attribute (lifecycle)
- PI / PIL / Labels not hyperlinked
- Module 2 not hyperlinked to 3 / 4 / 5
- 3.2.R granularity incorrect
- Letters not OCR scanned
- Application Form 1.2.1
  - not signed, application number not included
  - not OCR scanned
  - follow-up sequence - document operation attribute not “new”.
  - Incorrect dates in follow up sequences
- Incomplete or incorrect data in envelope
Business Validation cont.

- Validation template not hyperlinked for ease of technical verification by reviewer, and hard copy not included in M1.8
- Official footers of forms changed
  - Because of invalid sequence 0000, non-compliance in business validation only detected in replacement sequence
  - Errors corrected in 0001 only to find new errors, e.g.
    - letter OCR scanned in 0000 but not in 0001
    - Application forms of different strengths identified with leaf titles in 0000 but not in 0001
    - PI/PIL no longer hyperlinked
Business Validation *cont.*

- Incorrect information in envelope
  - Data in support of efficacy incomplete
  - Related sequence

<table>
<thead>
<tr>
<th>eCTD Sequence:</th>
<th>0001</th>
</tr>
</thead>
<tbody>
<tr>
<td>Related eCTD Sequence:</td>
<td>none</td>
</tr>
<tr>
<td>Duplicate Applications: (Proprietary Names / Dates of Application)</td>
<td>N/A / N/A</td>
</tr>
</tbody>
</table>

- Information in envelope ≠ 1.2.1 ≠ 1.8
Business Validation cont.

- **3.2.R Regional Information**
  - Incorrect granularity
  - Node extensions not used
  - Section numbers not included

- **3.2 Body of Data**
  - Sections included that are not applicable
    - This affects life cycle management of these sections
Business Validation cont.

0003: 3.2.R Regional Information

Batch records of samples
Certificates of Analysis
Materials of animal and/or human original
Multiple API manufacturers
Overview
Pharmaceutical and Biological availability
Pharmaceutical availability studies
Reference Products

The node extensions have not been numbered according to the relevant sections as had been requested before.
Element 1.0 Letter of application

- The amendment schedule should not be an attachment to the letter, but be included in M1.5.2.
- The use of the amendment schedule is not correct:
  - The column for the Reviewer's comment is required.
  - The differences between the current and amended modules have to be indicated.
Business Validation cont.

**Element 1.3 South African labelling and packaging**

- The annotated PI and PIL should be included in M1.5.5
- The annotated documents could at first not be located and were then found in M1.3.1/2 as one document each.
- In view of the life cycle issues created by documents submitted in the incorrect folders, the submission cannot be accepted.
Business validation **cont.**

- 0002: 1 Administrative Information and Prescribing Information
  - 0002: Envelope
  - 0002: Module 1 ZA
    - 0002: 1.0 Letter of Application
    - 0002: 1.2 Application
    - 0000: 1.3 South African labelling and packaging
    - 0002: 1.4 Information about the experts
    - 0002: 1.5 Specific requirements for different types of applications
    - 0002: 1.6 Environmental risk assessment
    - 0002: 1.7 Good manufacturing practice
    - 0000: 1.8 Details of compliance with screening outcomes
    - 0000: 1.9 Individual patient data - statement of availability
    - 0000: 1.10 Foreign regulatory status
    - 0002: 1.11 Bioequivalence trial information
    - 0000: 1.12 Paediatric development programme
    - 0000: 1.13 Risk management plan

- 0003: 1 Administrative Information and Prescribing Information
  - 0003: Envelope
  - 0003: Module 1 ZA
    - 0003: 1.0 Letter of Application
    - 0003: 1.2 Application
    - 0003: 1.3 South African labelling and packaging
    - 0002: 1.4 Information about the experts
    - 0003: 1.5 Specific requirements for different types of applications
    - 0000: 1.6 Environmental risk assessment
    - 0003: 1.7 Good manufacturing practice
    - 0000: 1.8 Details of compliance with screening outcomes
    - 0000: 1.9 Individual patient data - statement of availability
    - 0000: 1.10 Foreign regulatory status
    - 0002: 1.11 Bioequivalence trial information
    - 0000: 1.12 Paediatric development programme
    - 0000: 1.13 Risk management plan
Leaf titles

- Each document in the eCTD has both a **file name** and a **leaf title**.
- File name is the actual name of the file – the evaluator doesn’t see this
  - e.g. application-letter-10mg.pdf and label-10mg.pdf are the file names
- **Leaf title** is displayed when the evaluator views the submission
- Should be sufficiently descriptive and brief
Leaf titles cont.
Business Validation cont.
|   |   | \begin{tabular}{p{1cm}p{13cm}}
| 7 | Are leaf titles descriptive and logical, e.g. for applications with various strengths, and new documents in follow up sequences? | \end{tabular} | Y □ √ | N □ | 

Leaf titles are not sufficiently descriptive for easy identification.
Validation failure

- Technical validation failure:
  - Replacement sequence required
  - “Screening” fee again payable

- Business validation failure:
  - Next sequence will be required

- ......Delay
Evaluation phase

OH WOW!
PARADIGM SHIFT!
What does evaluator see
What does evaluator see
Evaluation phase

Content – compliance with requirements

- Searchable
- Navigation

However

- Not possible to copy text as documents are not OCR scanned
- Documents not in correct section
- Module 3.2.R not completed
  - Not applicable to generics only
- Whole module numbered, instead of per document
How to locate documents in eCTD

Hypertext linking and Bookmarks

ICH eCTD Specification v3.2.2
- Appendix 3 & 7

2.23 Submission in eCTD format

Leaf titles

2.23 Submission in eCTD format
Bookmarks

Documents exceeding 5 pages that contain multiple headings/sections, tables, figures

- Provide enough bookmarks for easy navigation in the document
- Use meaningful names
- ToCs that are hyperlinked
- List of tables/figures if included
Hyperlinks

Include at least the following hyperlinks:

- Cross-references in the package insert (1.3.1.1) to the actual references
- Cross-references in the Patient Information Leaflet (1.3.2) to the package insert (1.3.1.1)
- References in Sections B to D of the Screening template (1.8) to the documents in the eCTD
- Summaries in Module 2 to the relevant documents in Modules 3 to 5
- Document Table of Contents (ToC) to the corresponding section in the document
Hyperlinks cont.

Check the hyperlinks before submitting:

- Are there any broken hyperlinks?
- Do all hyperlinks go to correct destinations?
- Are all external hyperlinks removed? (e.g. web links, e-mail links)
- Do hyperlinks appear as **blue text** or **blue box links** if blue text isn’t possible?
- Are hyperlinks set to Inherit Zoom?
Appendices not hyperlinked.
Documents that follow this list of Appendices are not the Appendices numbered, also not in the same order as the list of Appendices.
How should the reviewer locate the Annexures?
So evaluation will stop!
Conclusion

*Presentation and content issues in CTD manifest in eCTD*

- Read the guidelines
- Follow the guidelines
- Check the submission
- Think like an evaluator

*Electronic is not as patient as paper*

- Paper is forgiving – can slot in extra pages or replace documents just before submission
- eCTD is not forgiving – last minute changes will lead to checking of hyperlinks, re-validation, re-export
Conclusions from pilot phase cont.

- Concessions made in the pilot phase may no longer be possible when going live
- Importance of quality control apparently not understood
- Evaluation will not continue if there are insufficient bookmarks & hyperlinks
- Incorrect lifecycle attributes or placement of documents will lead to validation failure
- IT support crucial – industry and agency
- Co-ordination of Committees recommendations sent to applicants also for CTD
eCTD roll-out
eCTD roll-out

2.26_CTD_implementation_road_map_Feb16_v6

Start Operational Phase

- **Step 4(a):** eCTD process open to entire industry for new applications for registration of NCEs - **01 April 2016**
- **Step 4(b):** eCTD process open to entire industry for new applications for registration of generics - **02 January 2017**

To date 8 NCEs accepted
5 submitted, 1 failed business validation
**eCTD roll-out**

**Review of Guidelines & technical requirements**

- Amendment of validation rules, based on EU, and ZA requirements e.g.
  - Folder structure check
  - Eliminate “append”
  - Compulsory documents and lifecycle attribute

<table>

One or several application forms can be added to this section. For more information please refer to the Guidance for the Submission of Regulatory Information in eCTD format.

For more information please refer to the Guidance for the Submission of Regulatory Information in eCTD format.
Review of Guidelines & technical requirements

Update of guidance and specification, e.g.

- More information on hyperlinks and bookmarks
- The maximum individual acceptable file size is approximately 200 MB. If a file size exceeds 200 MB, the file should be split into two files. The file size should ensure clarity, speed of download and ease of review.
- Include 3.2.R structure

<table>

</table>
Review of Guidelines & technical requirements

- **Amendment of Envelope**
  - Response to pre-registration recommendation identifies specific Committees’ recommendations
  - Submission type: unique ➞ repeatable
  - *Until such time the type "pre-reg-cr: Response to Council resolutions" should be used.*

<table>
<thead>
<tr>
<th>Element</th>
<th>Attribute</th>
<th>Description/Instructions</th>
<th>Constraint</th>
<th>Occurrence</th>
</tr>
</thead>
<tbody>
<tr>
<td>Submission</td>
<td>✓</td>
<td>Provides administrative information associated with the submission.</td>
<td>Mandatory</td>
<td>Repeatable</td>
</tr>
</tbody>
</table>
eCTD roll-out *cont.*

- Workshop with industry
- Training of additional evaluators

*In the mean time*

- Working codes
  - As in General Information guideline, preceded by “eCTD” e.g. “eCTD ANA”

- Screening & Application fees
  - Paid with initial sequence, PoP in 1.2.2.1

- Submission media *(4.1 in 2.23 Guidance)*
  - CDs or DVDs – no zip drives, rar-file or any other file format that has been compressed

- Do the quality control
Before you submit, ask...

- If I was an evaluator, could I…….?  
  ✓ Easily locate the information/document  
  ✓ Easily copy and paste from the document  
  ✓ Easily differentiate between same type documents displayed in the eCTD  
  ✓ Easily navigate and access references in documents via bookmarks, links and the Table of Contents  

- The ultimate goal is to provide an evaluator-friendly eCTD so that the focus of evaluation is on content, not format.
We all want eCTD……
